

Introduction to Sostento

Partnership Deck

2025

MISSION

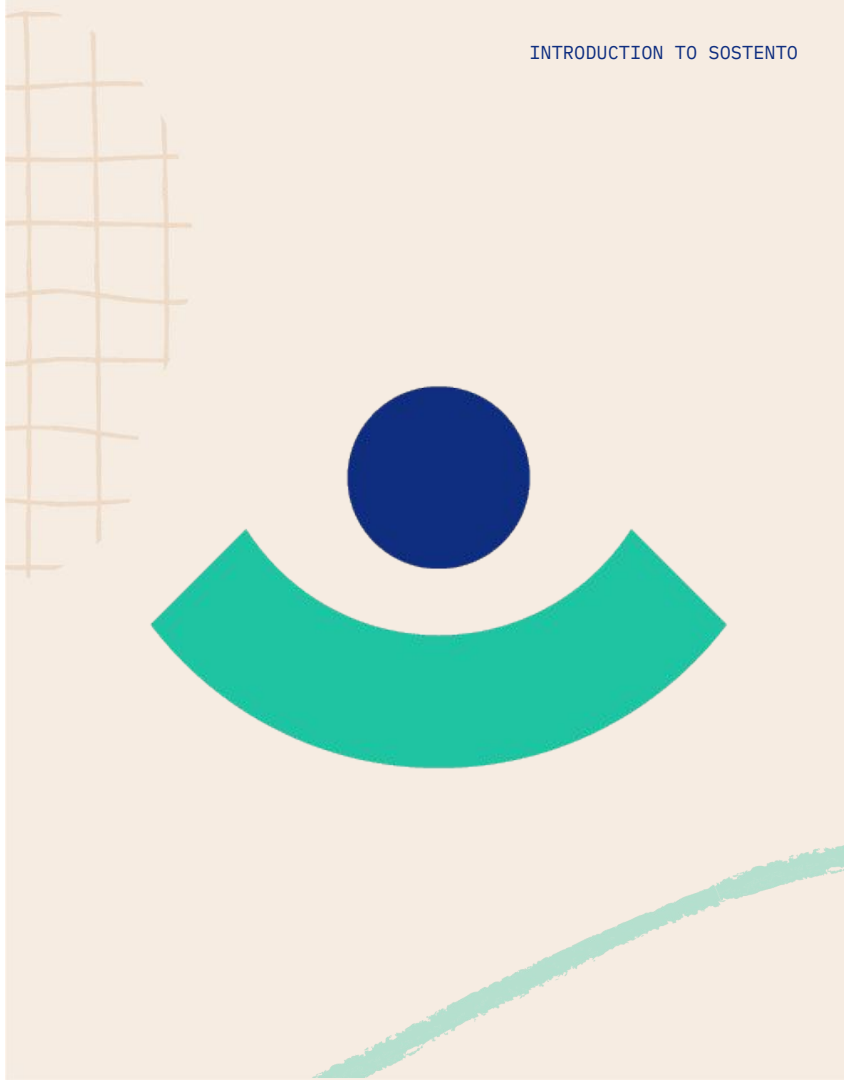

Propel solutions with frontline health workers that remove patient access barriers to care, prevent sickness, ease suffering and save lives.

Sostento is an Italian word that means to uplift, nourish and sustain. We serve individuals living at or below the poverty line and the health providers that care for them.

VISION

A future where everyone can access quality healthcare when needed, regardless of income, geography, or other social drivers of health.

Over 25 million Americans are uninsured and lack comprehensive access to health services. We envision a world without barriers to timely, quality healthcare

Our History

Next up, in **2026**

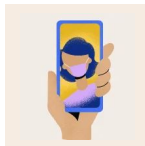

We have a board approved roadmap to 2030 with a goal of helping 10% of uninsured Americans remove a barrier to care

What We Do

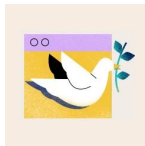

Increase access to care and empower frontline health workers

Our team of public health specialists, designers and technologists deliver solutions that remove barriers to care for low-income, uninsured individuals.

Learning and Development

With a problem area identified, our interdisciplinary team mobilizes through desk research, health worker, patient and subject matter expert interviews, site visits and focus groups. We synthesize findings to deliver insights and implementation development roadmaps.

Solution Design and Testing

Working side-by-side with frontline health workers we co-create solutions that will work for both provider and patient in the low-resource setting. We use existing technologies, but will build new tools when necessary and create supporting training materials.

Implementation Support and Data Collection

Our implementation support ensures both uptake of solutions and embeds data collection to measure impact. We build or own data collection tools to collect sensitive socioeconomic and social drivers of health information from patients served.

Who Supports Our Work

Public, private and governmental groups fund through grants, donations and fee-for-service

Transportation Solution: *Health Access Rides with Uber*

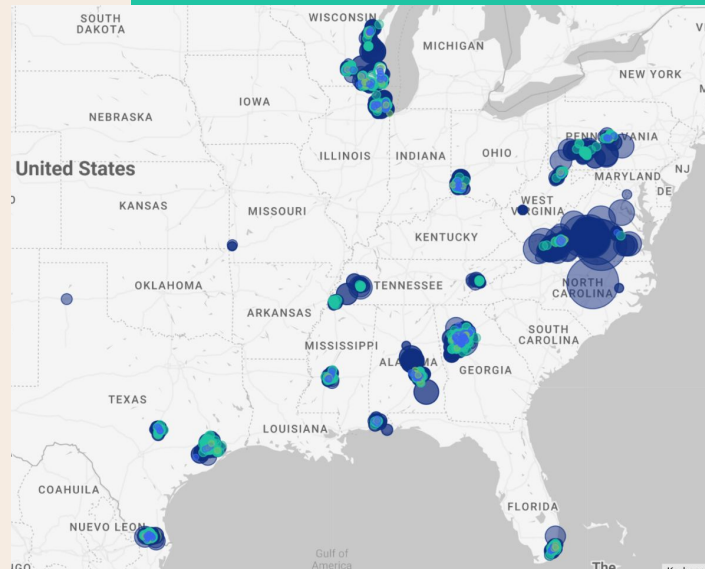

Custom Rideshare Delivery Design - We overcame adoption barriers by empowering health workers to mobilize and order rides.

Implementation Support Services - We provided trainings, administrative capacity building and helped clinics troubleshoot on workflows and integration.

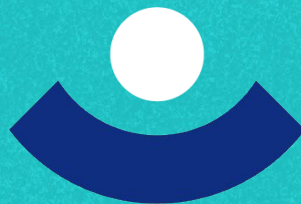

Data Collection and Insights - We embedded rider and ride data collection to measure who was taking each ride, for what purpose and tracking cost along the way.

50,000+

*Total Rides Completed Across
9,500 Riders*

*Rides were coordinated for
patients by over 200 health
workers across 15 states.*
